

THE BELIFEX PAPER

Belifex Blockchain Solutions

INTRODUCTION

“

Belifex Blockchain Solutions is an open-source public blockchain and cryptocurrency project. Belifex will be the beginning of a new era with the projects MVP called BeliPay, the ultrasonic speed Gateway/Processor Platform. BeliSwap will provide staking and farming solutions for all projects build on Binance Smart Chain.

FUTURE GOALS

RESEARCH OF AI NEURAL ROBOTICS

Blockchain technology is growing everyday at a fast-passed rhythm and it's possible to integrate it with many systems, namely Robotics with AI services. However, this is still a recent field and there isn't yet a clear understanding of what it could potentially become. We conduct an overview of many different methods and platforms that try to leverage the power of blockchain into robotic systems, to improve AI services or to solve problems that are present in the major blockchains, which can lead to the ability of creating robotic systems with increased capabilities and security.

FUTURE GOALS

We will invest in
Green Power

The price of energy around the globe is currently under pressure by the global inflation. Our goal for the future would be to invest in charity event or organizations that invest in more green and more energy saving options.

We Belifexians only have 1 planet afterall.

WHY INVEST IN BELIFEX?

Rewarding for the long-term Hodlers!

All hodler's with the balance in their wallet < 500.000 BEFX will be receiving dividends in the form of BUSD.

BEFX hodlers will receive \$BELI airdrop PRIOR to it's fairlaunch

You have seen this this first, BELI will be launched directly together with the BeliSwap. So if you are a legit BEFX holder you will be able to earn some extra \$\$\$ on the launch. The time of the snapshot will be released later.

Unique " Most Valuable Products"
BeliPay and BeliSwap

Belifex will be one of those projects that has multiple working products and has been developing in the background while being completely self-funded
